

Montana Cancer Screening Program (MCSP)
Anesthesia Approval Form
Criteria for Approval of Anesthesia/Deep Sedation for Colonoscopy

Check Reason Anesthesia is necessary (please note Propofol is not covered by MCSP unless the patient cannot be sedated with standard moderate sedation):

- ☐ Prior difficult/unsuccessful colonoscopy/major discomfort/failed case
- ☐ Morbid Obesity, BMI greater than 35
- ☐ Psychiatric Illness or mentally challenged
- ☐ Drug Dependency; Alcohol Abuse; on narcotics or Benzodiazepam maintenance
- ☐ Intracranial Pathology (Alzheimer, Parkinson, Seizure D/O)
- ☐ Hypertension (uncontrolled)
- ☐ Coronary/Valvular/Pericardial Heart Disease
- ☐ Life Threatening Arrhythmias
- ☐ Cerebrovascular Disease (Severe)
- ☐ COPD/Emphysema/ Acute Respiratory Failure
- ☐ Hepatic Insufficiency
- ☐ Renal Insufficiency
- ☐ Difficult Airway, Tracheostomy/Stridor/Goiter/Sleep Apnea
- ☐ Thin women with history of pelvic surgery, radiation therapy, endometriosis, chronic pelvic pain, BMI less than 25.

This case has been reviewed and it has been determined that the patient cannot be sedated with standard moderate sedation due to reason(s) checked above.

Patient Name: _____ Date of Birth _____

Physician Signature: _____

Date of signature: _____
